

Fortinet VPN to NY5 Setup Instructions for Windows

FortiClient client download

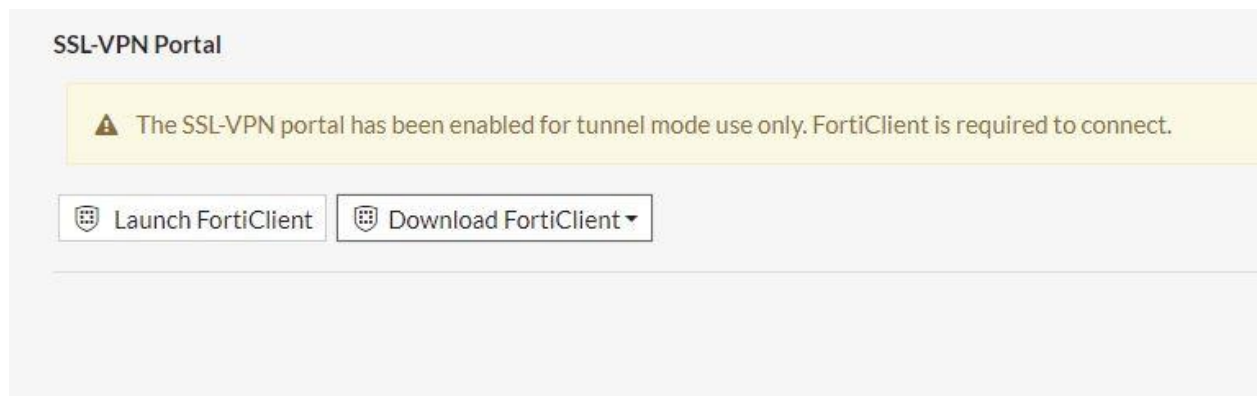

Disconnect from the Checkpoint VPN client. – You cannot be connected to the current VPN while installing the Fortinet client

1. Open a browser and go to <https://mars.sandata.com>
 - a. Login using the same credentials that you use for the Checkpoint VPN. Username and PasswordGoogleAuth code

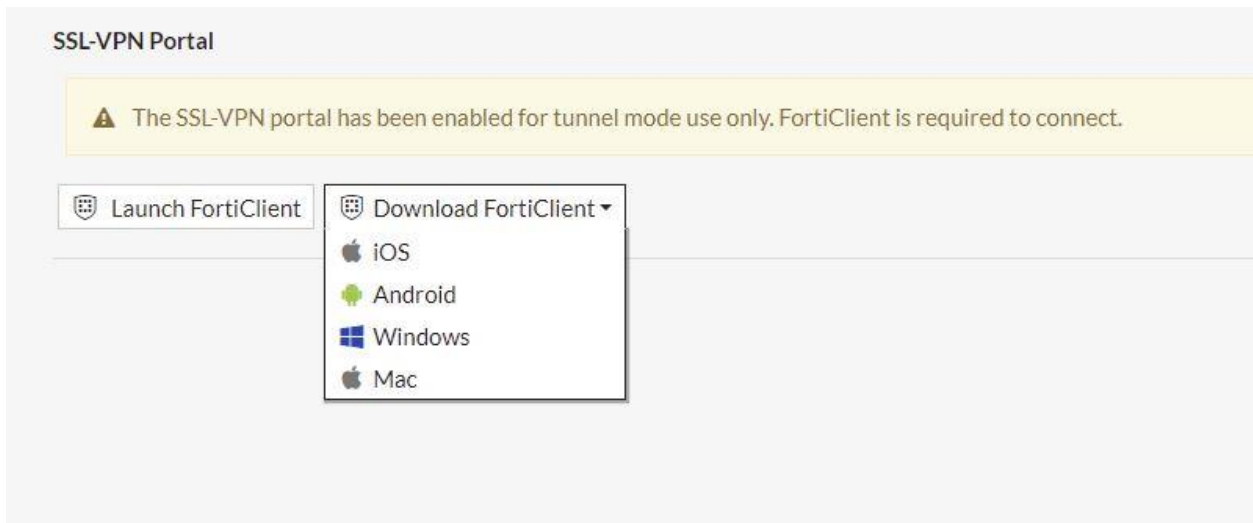

A login dialog box titled "Please Login" with a Fortinet logo. It contains two input fields: "Username" and "Password". Below the fields are two buttons: a green "Login" button and a white "Launch FortiClient" button.

2. Select the "Download FortiClient" button

The SSL-VPN Portal interface. At the top, it says "SSL-VPN Portal". Below that is a yellow warning box with a triangle icon and the text: "The SSL-VPN portal has been enabled for tunnel mode use only. FortiClient is required to connect." At the bottom, there are two buttons: "Launch FortiClient" and "Download FortiClient" with a dropdown arrow.

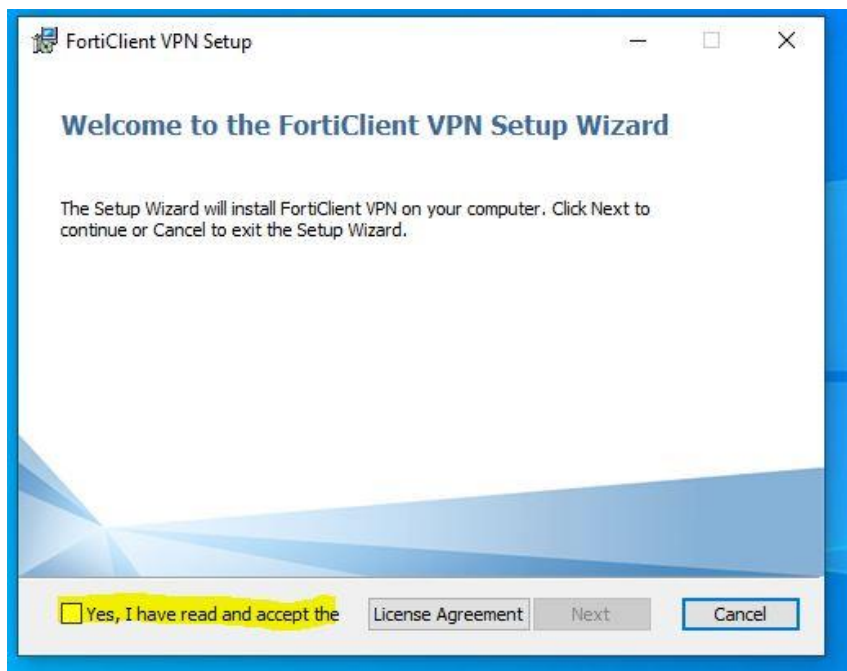

3. Select the appropriate option from the list for your device

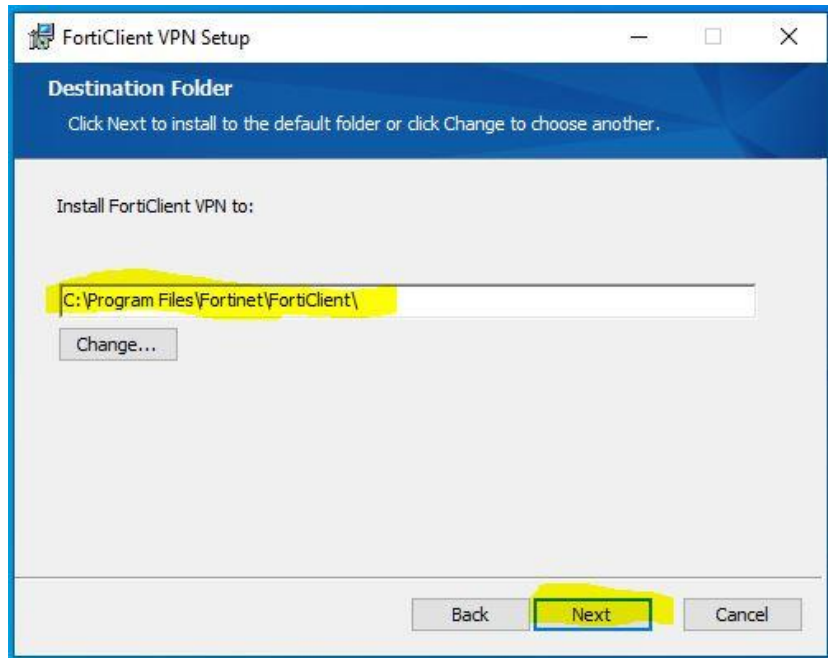

4. The FortiClient software will download to your device. (It will save to the \downloads folder on Windows PC's as FortiClientVPNOnlineInstaller_7.0.exe))

FortiClient Installation

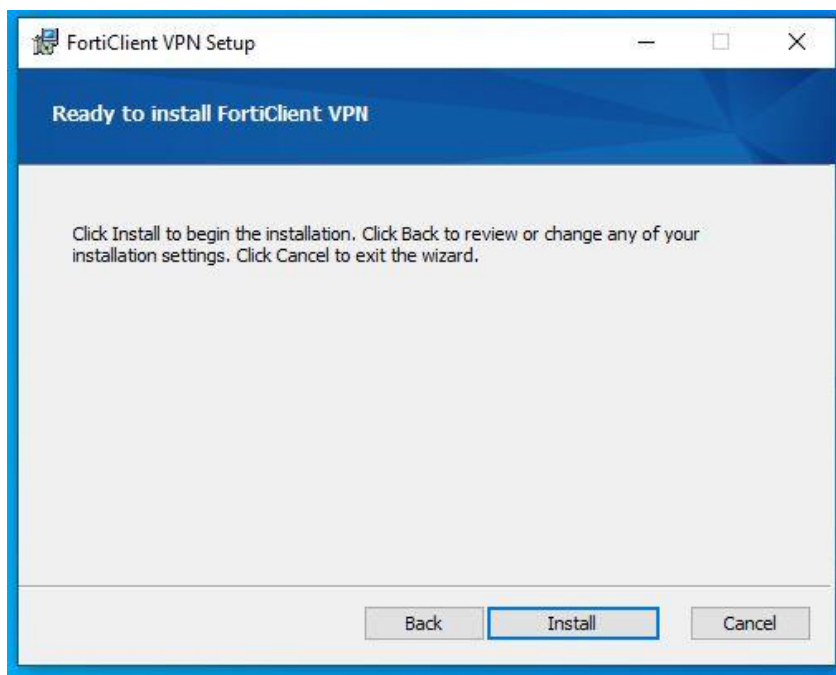

1. Go to your "Downloads" folder on your PC and double-click on the "FortiClientVPNOnlineInstaller_7.0.exe" file to start the installation.
2. Accept the license agreement and click "Next"

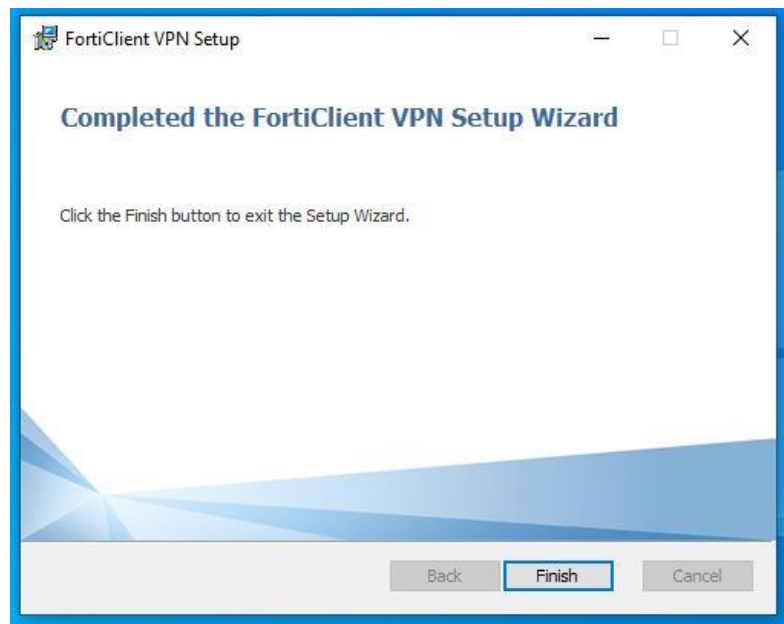

3. Accept the default installation directory and click "Next"

4. Click "Install"

5. Click "Finish"

6. You should now have a blue shield icon for the FortiClient

VPN Connection Configuration

1. Double-click on the blue FortClient icon shown above
2. Click on the "Configure VPN" link

3. Fill out the highlighted fields on the below image:
- a. Connection name = Sandata
 - b. Remote Gateway = mars.sandata.com
 - c. Authentication = select "Save Login"
 - d. Username = the "username" you currently use for the Checkpoint VPN
